MISSION STATEMENT

To ensure that the Bahamian Government, Business and people are never hampered in their activities by any inadequacies of statistics, their recent trends or their interpretation; and in particular to ensure that the managers of the Bahamian economy in the Ministry of Finance, The Central Bank and elsewhere, never lack adequate statistics nor argue about them.

PREFACE

This publication presents data on the value and volume of trade between The Bahamas and the rest of the world. It contains a five year series of summary data to provide an historical view of trade for The Bahamas during that period. Detailed tables (both annual and quarterly) of the year 2008 are presented in order to provide an in depth view of trade for that year.

Reports on trade statistics for The Bahamas have been published since 1968 and have undergone many revisions in both the format of the report and the methodology of the compilation of the figures. Initially, trade statistics were compiled using the Standard International Trade Classification (SITC), which classifies commodities by two criteria (1) the material of which the commodity has been made and (2) how the commodity will be used. This classification, subjected to periodic revisions, is still used today, though not predominantly.

The Harmonized System (HS) was adopted by the Customs Co-operation Council in June 1983 and enforced by the HS Convention in 1988. In 1993, the Statistical Commission, at its 27th session recommended that countries adopt the HS for the compilation and dissemination of their international trade statistics. In The Bahamas, however, the Customs Department did not implement the HS until July 1996 and the Department of Statistics followed suit in January, 1997. Since its implementation, the HS have been regularly revised, the latest having occurred in 2007. However, the 2007 revisions were not reflected in the 2007 figures/report as the changes did not take effect until July, 2008. As a result the figures in this 2008 report are reflective of a mid-year revision in the HS code.

The data in this report are collected by the Bahamas Customs Department and are forwarded to the Department of Statistics where they are processed, analyzed and published. Both the SITC and the HS system of commodity classification are used in the presentation of the data.

Data Notes and Explanation

1. Data Source

The source documents of the statistics in this report are the Customs import entries, declarations and export documents submitted by importers and exporters, which are subject to verification and approval by The Bahamas Customs Department.

2. Coverage

As recommended by the International 'Merchandise Trade Statistics Manual', and to the extent possible, the General Trade System is used for the recording and compilation of external trade statistics for The Bahamas. This system covers all types of inward and outward movement of goods through a country or territory, including movements through warehouses and free zones. In essence, it includes all merchandise that either add to or reduce the stock of material resources of a country or territory by entering (imports) or leaving (exports) the country's economic territory.

3. Transaction Values

The value of imports are c.i.f., that is, the value at the port of importation including freight and insurance charges and other charges incidental to the delivery at the port of import.

The values of exports are f.o.b., that is, the values of goods including the cost of transportation and insurance to the border of the exporting country.

The values presented are Bahamian dollars and the exchange rates prevailing at the time of importation are used in converting foreign currencies.

4. Changes/Exclusion to Presentation of Trade Data

Excluded from the compilation of the foreign trade statistics are the goods traded that do not make any changes to the wealth and material resources of the country. Examples of such goods are crude oil, residual fuel oils and certain chemicals temporarily imported for storage purposes only.

5. Commodity Classification

The classification of goods used in this report is the Harmonized Description and Coding System, better known as the Harmonized System and the Standard International Trade Classification (SITC). The Harmonized System (HS) arranges goods according to their degree of manufacture and classifies them into ninety-seven chapters which are grouped into twenty-one sections. Section twenty-two was added to accommodate local trade. The Standard International Trade Classification (SITC) on the other hand, arranges goods according to their stage of production. The SITC contains sixty-seven divisions which are condensed into ten sections.

Definitions and Abbreviations:

Imports – Goods imported from foreign countries for further processing or local consumption.

Domestic Exports – Goods produced or manufactured locally and exported to foreign countries.

Re-exports – goods exported in the same condition as when imported from a foreign country

Balance of Trade – is the total export minus the total import. It is usually calculated totally for a country or for each trading partner.

Port of Entry – a port that serves as a first port of entry from an international port.

2008 Annual Trade Data Highlights

Data on merchandise trade for the year 2008 show that the total value of commodities imported into The Bahamas totaled some \$3.2 billion dollars resulting in a slight increase of 4% over 2007's total of \$3.1 billion.

The category of Mineral Fuels was the largest contributor to goods imported for 2008, totaling some \$847 million dollars and accounting for 26% of total imports. This category was followed by the category of Machinery and Transport Equipment which totaled \$642.8 million (or 20% of all imports **(Chart 1)**).

Other major contributors to imports were Manufactured Goods (wood, metal, steel or other construction materials, textiles and articles of clothing) which accounted for \$444 million (14% of total imports) and the Food and Live Animals category (fresh meats, fruits & vegetables and processed foods) which accounted for almost \$430 million (13% of total imports).

The commodities which contributed most to total imports were 'other diesel' valued at \$361.1 million, 'motor gasoline' at \$233.0 million, 'jet fuel' at \$113.9 million and 'other bunker oil' at \$80.4 million were among the top items imported into The Bahamas. The combined value of these commodities represented some 26% of total imports **(Table i)**.

Total exports (domestic and re-exports) totaled \$701.5 million. Domestic exports (\$409.6 million) accounted for 58% total exports, representing an 8.1% increase over 2007's total of \$379.1 million. The categories of Chemicals totaling \$226.0 million (55.2% of total domestic exports) and Food and Live Animals totaling \$82.2 million (20% of total domestic exports) were the main contributors to domestic exports. **(Table 2.3)** Included in the Food and Live Animals category were crawfish, rum and salt. More significantly, of these two categories, three commodities alone, 'expansible polystyrene' valued at \$150.1 million, 'other compounds containing a pyrimidine ring' at \$67.4 million and 'spiny lobster frozen' at \$77.7 million accounted for some 72% of total domestic exports **(Table ii)**.

Footnote: Exports include Re-exports

The balance of trade (total exports minus total imports) continued to result in a deficit. After the slight decrease (less than 1%) experienced between 2006 and 2007, the trade balance between 2007 and 2008 showed an increase of 3.4%.

Main Trading Partners

While there was a significant volume of trade as it relates to imports between The Bahamas and Venezuela (\$168.3 million) and Curacao (\$65.4 million), the United States maintained its position as The Bahamas' principal trading partner. The United States alone represented 87% of total imports and about 69% of total exports. In terms of imports Venezuela and Trinidad & Tobago more than doubled their percentage shares from 2.1% and .5% in 2007 to 5.2% and 1.1% respectively in 2008.
