The consulting services ("the Services") include acting as the focal point for overall development and delivery of complex internal/external IT systems development projects across a variety of products and technologies. The duration of the consultancy is for Twelve (12) months.

Main activities include:

- Managing the delivery of multiple complex simultaneous system development projects from design through to release.
- Understanding and contributing to technical solutions from design through to code level.
- Working closely with outsourced providers to ensure the management of any delivery risks or issues.
- Defining, documenting and reporting on project delivery phases including activities, sub-activities, milestones, event log, issues and risk log.
- Ensuring awareness, involvement and support from the key stakeholders and participants by building strong project teams robust communication on the project status throughout its life cycle.
- Participating in reviews and meetings and provide updates on project progress.
- Taking responsibility for ensuring that risks/issues are identified and managed closely and drive all stakeholders to deliver on time and to the required quality standards.
- Working closely with relevant teams internally to ensure alignment and coordination across operations as part of the seamless implementation of existing and new systems.
- Contributing to post-implementation reviews helping to demonstrate success or otherwise of projects and to introduce processes to yield more predictable results.
- Driving major and significant stability and performance improvements.
